WORK EXPERIENCE

Senior Front-End Developer
Russian Post

09/2021 – 03/2023   *Yerevan, Armenia*

- Upgraded system configuration by implementing a resource-sharing strategy, resulting in a 20% reduction in the number of loaded modules.
- Adopted a progressive architectural methodology for developing new services, simplifying the reusability of business logic and enhancing the developer experience.
- Applied test-driven development practices, which led to a 50% decrease in defects following code changes, improving the quality and reliability of the software.

Middle Front-End Developer
IT2G

11/2020 – 08/2021   *Saint Petersburg, Russia*

- Updated existing React components, reducing code duplication by 90%. This resulted in a significant decrease in the time required for making changes.
- Encouraged the use of React hooks to simplify writing business logic, eliminating the need for global application state and streamlining code maintenance.

Software Developer
NineOne

09/2019 – 11/2020   *Saint Petersburg, Russia*

- Created a design system for the company's business product based on the Material-UI library, which reduced the development time of new application modules by 30%.
- Successfully developed new websites on Next.js from scratch for government programs: 'Your Budget', 'Academy of Talents' and 'Open Budget'.
